Synerversity Leadership Academy is an integral program within the broader scope of Synerversity, a visionary learning platform founded and created by the esteemed Karen R. Jenkins. Mrs. Jenkins, widely recognized as a leadership thought leader and trusted high-value business consultant, established Synerversity in response to a profound realization within the world of business.

Throughout her extensive career, Mrs. Jenkins observed a significant gap in the efficiency of workflow within top-tier organizations. She recognized that many leaders in these organizations had been promoted and selected to advance based on their mastery of specific functions within their respective roles. However, the ability to excel in one's particular function did not necessarily equate to a profound understanding of how to lead a company's most vital asset—its people.

It became evident to Mrs. Jenkins that a myriad of challenges was impacting these organizations, such as issues related to change management, strategic problem-solving, decision-making, conflict management, and workflow optimization. These challenges often stemmed from a lack of implementable skill sets and knowledge gaps among the leaders within these organizations.

The consequences were far-reaching, leading to high turnover rates, demotivated teams, inefficiencies, the creation of organizational silos, a lack of diversity, and underperformance. The overall result was an imbalance in the energy within the organization, which adversely affected employee motivation, productivity and efficiency.

In collaboration with nationally recognized leadership and organizational development consultant, Brenda F. Anderson, KRJC' Synerversity Leadership Academy was developed to provide an innovative platform designed to bridge this leadership and knowledge gap. The Academy brings together top industry leaders to coach, develop, and engage with your organization's leaders. It serves as a platform for transforming outdated perspectives and mindsets that no longer serve leaders in today's dynamic business landscape. Instead, it inspires these leaders by providing cutting-edge leadership skills, approaches, and knowledge possessed by today's top-tier leaders.

The goal is simple yet transformative: to empower your leaders with the tools and insights they need to revitalize and invigorate your organization. By engaging, enlightening, and empowering your people, they can unleash their full potential and contribute to creating a synergetic reality within your organization. This synergy results in thriving teams, inspired individuals, and an organization that is primed for sustained success and growth.

At Synerversity Leadership Academy, we are committed to guiding your leaders on a journey that will elevate their leadership skills, renew their passion for their work, and, ultimately, reinvigorate your organization. Together, we'll embark on a transformational path to unleash the full potential of your leaders and energize your entire organization.

Unleashing Human Potential through Engage, Enlighten, and Empower = Synergy

At the Synerversity Leadership Academy, we believe in the incredible potential within every individual, and we recognize that humans, despite their remarkable progress, are not immune to the need for programming and growth. Our methodology is centered on the principle that to develop exceptional leaders, we must engage, enlighten, and empower them by facilitating a profound transformation from within.

Engage: Awakening Awareness and Self-Exploration

a. Interaction and Concept Engagement: Humans are not simply receptacles for knowledge; they are dynamic beings who learn best when they interact with concepts and see how they relate to their own identity and foundational beliefs. We engage leaders by helping them understand their why and creating an environment where they can interact with leadership concepts, breaking them down into digestible pieces. This process allows leaders to create new neural pathways and begin the internal work of adopting fresh leadership styles.

b. Self-Awareness: Self-awareness is the first step. Leaders explore their values, their subconscious thought processes, and become open to exploring new leadership perspectives. We believe that self-leadership is the foundation upon which effective leadership is built.

Enlighten: Acquiring Fresh Knowledge and Skills

a. Unlearning Old Habits: With attention and awareness captured, we proceed to deconstruct old methodologies and subconscious leadership habits that no longer serve leaders, their teams, or their organizations. We recognize that these deep-seated patterns can hinder growth and success.

b. Forming New Concepts: A concept is nothing more than a new neural pathway, a new skillset for leaders. We enlighten leaders by providing them with knowledge, fresh approaches, different perspectives, and the skillsets employed by top global leaders. We break down the science of people, teams, and leadership into easily digestible pieces and provide a personal integration strategy.

Empower: Motivation and Inspiration

a. Ignition of Leadership: It's not just about motivation; it's about inspiration. We empower leaders by adding value to their leadership toolkit. We provide them with the "how" and "when" of leadership, concentrating on real-world leadership scenarios. Confidence is a cornerstone of empowerment, and our approach is designed to build that confidence within leaders.

b. Individualized Learning Styles: We recognize that leaders come in various shapes, sizes, styles, personalities, and motivations. Therefore, we respect their diverse learning styles. We understand that if we don't engage and enlighten them in a way that aligns with their unique learning style, they will not be receptive to our teachings. These three core elements—Engage, Enlighten, and Empower—culminate in what we call "synergy." Synergy is created when an organization reaches a state of maximum efficiency and operates like a well-oiled machine, incorporating its values while leveraging the energy and talents of the entire team. .

What Sets Synerversity Leadership Academy Apart?

We understand the science of learning and development. We acknowledge that organizations often invest in training and development programs, yet struggle to see sustained improvement in leadership, workflow efficiency, employee motivation, and synergetic team collaboration. We are different because:

- We recognize that leaders are diverse in learning styles.
- We engage leaders to capture their attention and raise their awareness.
- We enlighten leaders by rewiring techniques and skills that allow them to create new neural pathways that align with effective leadership.
- We empower leaders through motivation, inspiration, and building confidence in their leadership styles.

This unique approach has yielded success, and the results speak for themselves. The Synerversity Leadership Academy is where leaders are transformed, and organizations thrive in the realm of synergetic success, getting ultimate return on their investment to their most valuable asset – their people.
